### **DETAILED ACTION**

1. This is a Non-Final Office action to an amendment received on 10/07/09 for patent application 10,824,290.

## Status of Claims

2. Claims 1-6 are pending in this application.

## Claim Rejections- 35 U.S.C §103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1-6 are being rejected under 35 U.S.C 103(a) as being unpatentable over US Patent 7,082,412 to Treider et al, herein Treider in view of "Accounts Receivable Financing", Johnson, Thomas A.. Internal Auditing. Boston: Fall 1990. Vol 6, Iss.2; pg 61, 3 pgs herein Internal Auditing.

Regarding claim 1, Treider discloses a method for pushing credit payments as buyer initiated transactions, comprising: determining payment instructions for an accounts payable, the accounts payable representing a purchase made by a buyer from a merchant (column 13: lines 58-60; column 14: lines 5-10, lines 14-16); communicating electronically the payment instructions from the buyer to an acquirer (column 4: lines 45-53),; generating a transaction based upon the payment instructions without the transaction being initiated by the merchant, the transaction representing the buyer initiated payment; and settling the transaction (column 14: lines 29-40). However

Art Unit: 3696

Treider does not disclose the acquirer being an entity that buys credit card receipts from merchants. Internal Auditing discloses the acquirer being an entity that buys credit card receipts from merchants (Abstract). Therefore it would have been obvious to one of ordinary skill in the art at the time of the invention to modify Treider's invention to include the acquirer being an entity that buys credit card receipts from merchants. One of ordinary skill in the art would have been motivated to include the acquirer being an entity that buys credit card receipts from merchants in order to ensure that the entire process of purchases the accounts receivable is done in an efficient manner.

Regarding claim 2, Treider discloses the method of claim 1. Treider further discloses utilizing merchant profiles to determine whether payment instructions should include a credit payment or a debit payment, wherein the generating of the transaction takes place where the payment instructions include a credit payment and wherein a separate step is used of electronically transferring funds from the buyer to the acquirer where the payment instructions include a debit payment (column 4: lines 3-6 and lines 33-37).

Claim 3 is being rejected using the same rationale as claim 1.

Claim 4 is being rejected using the same rationale as claim 2.

Claim 5 is being rejected using the same rationale as claim 1.

Claim 6 is being rejected using the same rationale as claim 2.

## **RESPONSE TO ARGUMENTS**

1. Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.
